### Business challenges

- > Manual process of managing end-to-end process of contractor searching and hiring professional

### Business Benefits

- > Centralization of complete record and process
- > Prioritize location for contractor search to get hired for nearby location
- > Robust, high performance and easy to use app
- > Multiple options for dream job increase profile visibility
- > Real-time access to updated record

## Solution

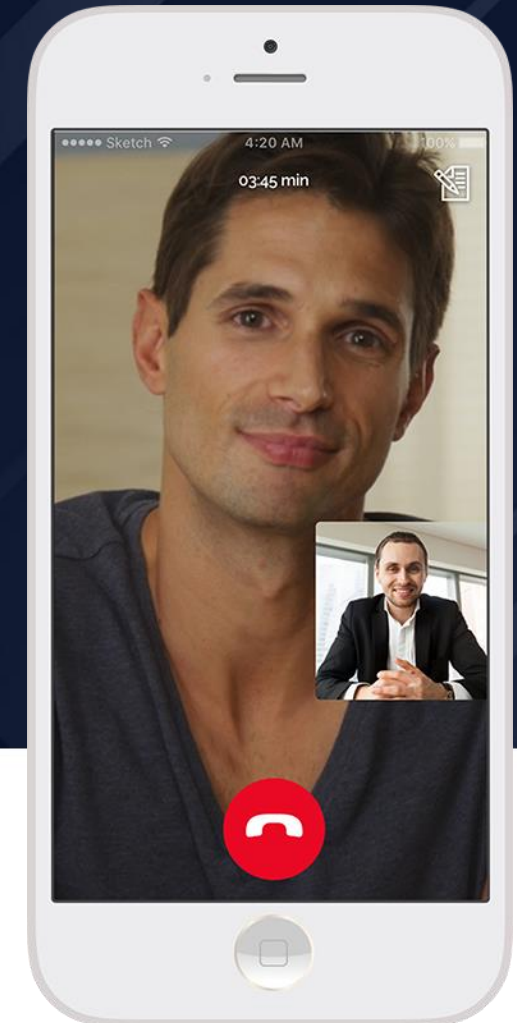

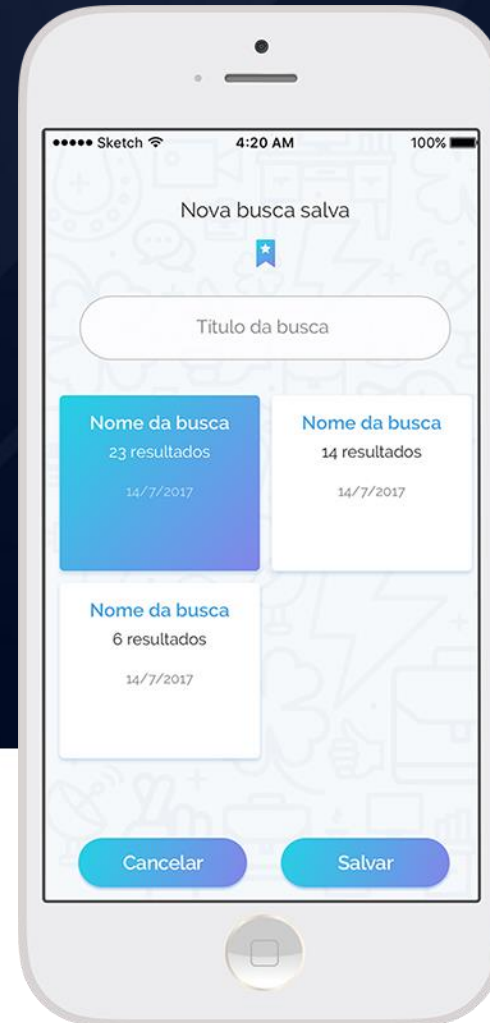

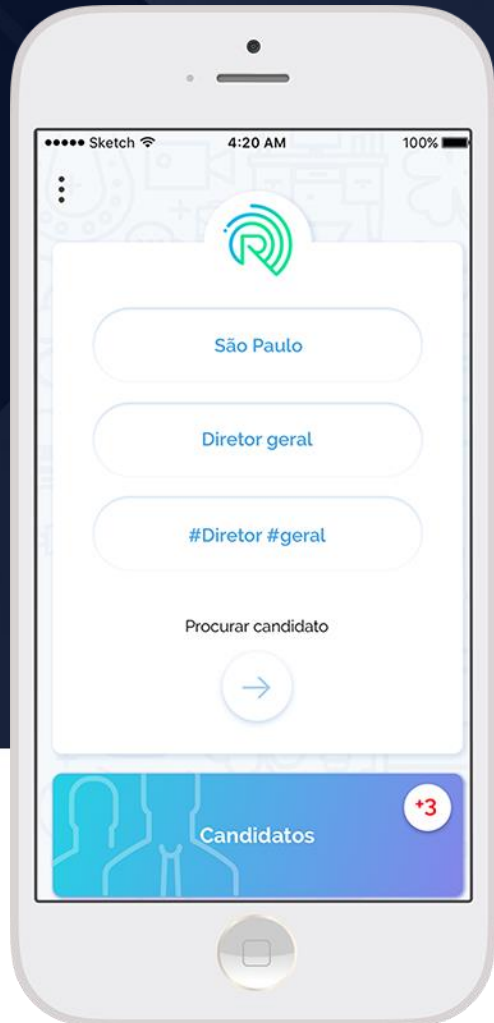

The client involved Systematix in developing a mobile app streamlining recruitment process for Brazil based contractor and professionals. Through this app contractor able to search candidate based on city and skillsets, send invitation, schedule interview, even take interview via app and hire candidate.

One of the features that we have developed for this app to take video interview and write notes during the video call for future reference. Pre-schedule video interview helped candidate not to leave his/her location, interview queues and locomotion expenses. This app also allows candidate to select three most suitable job opportunity that he/she is looking for to speed up and increase chances of getting hired soon.

## FEATURES

- 1 Interview scheduler
- 2 Interview via app
- 3 Video interview
- 4 Candidate search
- 5 Writing notes during interview
